FEATURES

- Data Delivery Package Enhancement
 - Standard set of data delivered on a regular basis
 - Provides the ability to create and run custom reports
 - If you currently merge multiple Four51 reports, you could create a single report
 - Create queries for internal review, business planning or for a buyer requested report
 - Samples of custom reports
 - Users, the groups they are assigned to and approval rule set up for that user
 - Spending Account Transaction report with Product information
 - Add the actual shipping cost to the Shipment report
 - Would like to see the Shipping Method for the shipper that was selected for an order
 - Receive variant and spec data for a variable product(s)
 - View order information along with the line item spec name and value details
 - Want more information?
 - Submit a case through the standard case submission method

All Beta Program information including this power point, a link to submit questions and feedback and the beta environment logon link will be available on Access Four51 within the Application Updates section.

Activity in this environment will not affect your customers in any way!
